

## Advanced Seismology ( Rays and Waves) Contents

### CHAPTER 1 INTRODUCTION

Seismic waves .....	1
Departure from isotropy .....	2
Departure from perfect elasticity .....	2
Departure from homogeneity .....	3
Stratified models .....	4
References .....	4

### Chapter 2 Ray Theory

RAY METHOD .....	5
FERMAT'S PRINCIPLE .....	5
Snell's law	5
ELASTODYNAMIC EQUATION IN HOMOGENEOUS MEDIA .....	6
EQUATION OF A WAVE FRONT .....	6
Ray series	6
EIKONAL OR PHASE FUNCTION $R(x,t)$ .....	8
Slowness vector .....	8
ELASTODYNAMIC EQUATION FOR WEAKLY INHOMOGENEOUS MEDIA, HIGH FREQUENCY RAY THEORY	
Elastodynamic equation for homogeneous isotropic and perfectly elastic media .....	9
RAYS	11
INTRODUCTION .....	11
Reflected and transmitted waves .....	12
Laws of reflection and transmission .....	13
Anomalous plane reflected/transmitted waves and rays .....	13
Inhomogeneous waves.....	14
Head waves, diffraction, whispering gallery, inhomogeneous reflected and transmitted waves	
RAYS AS EXTREMALS OF THE FERMAT FUNCTIONAL .....	18
Ray fields	20
RAY PARAMETER	20
Ray coordinates .....	21
TRANSFORMATION MATRIX FROM RAY COORDINATES TO CARTESIAN COORDINATES. FUNCTION J	
Ray tube, geometric spreading .....	21
Caustics .....	23
Shadow zones .....	25
Radius of curvature of a ray .....	27
Energy in a bundle of rays .....	29
A Simple way to derive the eikonal equation .....	31
Appendix I A summary of important formulas .....	32
Appendix II (A) Solution of the wave equation in 2-D .....	35

Appendix II (B) An example for the use of slowness vector and eikonal and eikonal equation	
PROBLEMS .....	42
References .....	46

### CHAPTER 3

#### Reflection and Transmission at an Interface

SOLUTION OF THE WAVE EQUATION IN CARTESIAN COORDINATES .....	49
Wave equation in seismology .....	51
REFLECTION AND TRANSMISSION (REFRACTION) OF BODY WAVES AT AN INTERFACE ...	52
Summary of some important definitions and formulas of the theory of elasticity for an isotropic, homogeneous and perfectly elastic Earth .....	52
SEISMIC BODY WAVES .....	53
A SUMMARY OF WAVE EQUATION, DISPLACEMENT POTENTIALS AND DISPLACEMENT COMPONENTS .....	53
SOLUTIONS OF WAVE EQUATIONS .....	54
A note on the body wave amplitude .....	54
REFLECTION AND REFRACTION AT A FREE SURFACE (SURFACE OF THE EARTH) .....	54
THE CASE OF THE INCIDENT P WAVE AT THE EARTH'S SURFACE .....	55
The case of the incident SV wave at the Earth's surface .....	57
THE CASE OF THE INCIDENT SH WAVE AT A SOLID-SOLID BOUNDARY .....	61
Displacement components at the free surface .....	62
REFLECTION AND TRANSMISSION AT A LIQUID-SOLID AND AT A SOLID-LIQUID INTERFACE	63
Reflection and transmission at a soli-solid interface .....	69
THE CASE OF SOLID-SOLID INTERFACE: P WAVE INCIDENT FROM ABOVE, Z-AXIS IS DOWNWARD	69
The case of solid-solid interface: SV wave incident from above, z-axis is downward	71
Energy Flux due to reflected and transmitted waves, at an interface	73
Phase shift, inhomogeneous waves, interface waves.....	78
Phase shift .....	78
Kinds of phse shifts: phase delay and phase advance .....	79
Inhomogeneous wave .....	81
Interface wave .....	82
Problems .....	83
References .....	84
Chapter 4 Inversion	
INTRODUCTION .....	87
Classical travel time inversion .....	87
FLAT EARTH	87
Spherical Earth	90
GRAPHICAL SOLUTION .....	92
A summary of formulas for $X(p)$ and $T(p)$ .....	92
FLAT EATR H	92
The case of continuous change of $V$ vith depth $Z$ .....	93

INVERSION FOR STRUCTURES THAT INCLUDE LOW-VELOCITY-LAYERS(LVL) .....	93
SLICHTER'S METHOD .....	93
Gerver and Markusevitch (1966) method .....	96
THE FUNCTION $R(p)$ .....	96
Construction of $f - p$ curve, Bessanova method.....	96
INVERSION FORMULAS DUE TO GERVER AND MARKUSEVITCH TO INCLUDE LVL	99
Behavior of $T \square A$ , $p \square A$ and $r \square p$ curves at a discontinuity.....	102
AN INVERSION METHOD IN SEISMIC PROSPECTING .....	105
Calculation of layer thickness .....	107
CALCULATION OF LAYER VELOCITIES .....	109
Appendix Summary of some important formulas .....	110
PROBLEMS .....	
REFERENCES .....	116

## Chapter 5 Ray Tracing

RAY TRACING METHODS .....	117
METHOD OF STEP-WISE RAY TRACING .....	117
STANDART RAY METHODS (SRM) .....	119
EIKONAL EQUATION.....	119
RAY TRACING SYSTEMS .....	119
SOLUTION OF THE RAY TRACING SYSTEMS .....	121
KINDS OF RAY TRACING METHODS.....	122
RAY TRACING IN SIMPLE TYPES OF MEDIA, I.E. SIMPLE VELOCITY FUNCTION	122
5.4 Different ray tracing procedures .....	128
INITIAL VALUE RAY TRACING.....	128
NUMERICAL RAY TRACING .....	128
ANALYTIC RAY TRACING .....	129
5.4.4 RAY TRACING METHODS ( A SUMMARY ) .....	131
5.5 CELL RAY TRACING .....	132
Tetrahedron cells .....	133
Rectangular box cells .....	133
Boundary value ray tracing .....	133
The shooting method .....	133
The bending method .....	134
The continuation method .....	134
5.6 Dynamic ray tracing, propagator matrices .....	134
WHAT ARE PARAXIAL RAYS? .....	135
APPLICATIONS OF DYNAMIC RAY TRACING .....	136
PARAXIAL RAY APPROXIMATION.....	136
TRANSFORMATION MATRICES IN RAY CENTERED COORDINATES .....	137
Mathematical aspects of the dynamic ray tracing and propagator matrices, dynamic ray tracing in ray centered coordinates.....	138
Ray propagator matrices.....	139

Second derivatives of the travel time field along the ray .....	141
Appendix-I, Ray tracing systems (RTS) .....	142
Appendix-II Ray tracing system (RTS) for a linear velocity function .....	153
Problems .....	160
References .....	162

## Chapter 6 Synthetic seismograms

SYNTHETIC SEISMOGRAM .....	165
RAY THEORETICAL (CAGNIARD-DE HOOP) METHOD .....	166
REFLECTIVITY METHOD	167
STANDARD RAY METHOD .....	176
PARAXIAL RAY METHOD .....	177
GAUSSIAN BEAM APPROACH .....	178
THE BASIC CONCEPTS .....	178
5.4.4 Ray tracing methods ( a summary ) .....	131
5.5 CELL RAY TRACING .....	132
TETRAHEDRON CELLS .....	133
Rectangular box cells .....	133
BOUNDARY VALUE RAY TRACING .....	133
The shooting method .....	133
THE BENDING METHOD .....	134
The continuation method .....	134
5.6 DYNAMIC RAY TRACING, PROPAGATOR MATRICES .....	134
WHAT ARE PARAXIAL RAYS? .....	135
Applications of dynamic ray tracing .....	136
PARAXIAL RAY APPROXIMATION.....	136
Transformation matrices in ray centered coordinates .....	137
MATHEMATICAL ASPECTS OF THE DYNAMIC RAY TRACING AND PROPAGATOR MATRICES, DYNAMIC RAY TRACING IN RAY CENTERED COORDINATES .....	138
RAY PROPAGATOR MATRICES .....	139
SECOND DERIVATIVES OF THE TRAVEL TIME FIELD ALONG THE RAY .....	141
APPENDIX-I, RAY TRACING SYSTEMS (RTS) .....	142
APPENDIX-II RAY TRACING SYSTEM (RTS) FOR A LINEAR VELOCITY FUNCTION .....	153
PROBLEMS .....	160
REFERENCES .....	162

## CHAPTER 6 SYNTHETIC SEISMOGRAMS

Synthetic seismogram .....	165
Ray theoretical (Cagniard-de Hoop) method .....	166
Reflectivity method	167
Standard ray method .....	176
Paraxial ray method .....	177
Gaussian beam approach .....	178
The basic concepts .....	178

SOURCE-TIME FUNCTION FOR GAUSSIAN BEAM APPROACH .....	180
Gaussian beam method .....	180
ALEXEEV-MIKHAILENKO METHOD (AMM) .....	181
Restrictions of the ray method and some techniques for	
SYNTHETIC SEI SINOGRAMS .....	183
New techniques to evaluate HF body-wave seismograms .....	183
Basic ideas about WKBJ and Maslov seismograms .....	184
Synthetic Seismogram in Seismic Prospecting .....	184
Appendix I Remarks and explanation of some terms mentioned or discussed	186
Appendix II. Sommerfeld integral .....	189
Appendix III. Some useful definitions .....	190
Problems .....	191
References .....	191

## Chapter 7 Surface waves

SURFACE WAVES .....	197
Love waves .....	198
SH WAVES        198	
Boundary conditions.....	198
PERIOD EQUATION .....	200
Love modes, cut-off frequencies .....	201
EIGEN FUNCTION SOLUTIONS $V_{1N}$ IN THE LAYER AND $V_{2N}$ IN THE HALF-SPACE	202
Nodal planes of the displacements $V_{in}(x, z, t)$ of Love waves in the upper layer	203
DISPERSION OF SURFACE WAVES .....	204
Relation between phase and group velocities .....	204
RAYLEIGH WAVES .....	205
Stonley waves .....	208
DISPERSED RAYLEIGH WAVES .....	208
Boundary conditions .....	209
AMPLITUDE AND VELOCITIES OF RAYLEIGH WAVES .....	212
Waveform of dispersive surface waves .....	212
DEPENDENCE OF THE SURFACE DISPLACEMENT ON $T$ OR $A$ .....	213
Amplitude of surface waves .....	214
APPENDIX SOME IMPORTANT SURFACE WAVES .....	224
Problems .....	225
REFERENCES.....	226

## Chapter 8 Free oscillation of the Earth

FREE OSCILLATION OF THE EARTH.....	229
HISTORICAL REMARKS .....	229
General remarks .....	229

WAVELENGTH OF A WAVE AND THE DEPTH IT PROBES (SAMPLES) .....	230
Toroidal modes, spheroidal modes and their fundamental modes AND HIGHER MODES OR OVERTONES	231
Free oscillation of an elastic sphere.....	232
Wave equation in spherical coordinates .....	232
BOUNDARY CONDITIONS AND THE PERIOD EQUATION.....	234
Asymptotic form for higher modes of the spheroidal and TOROIDAL MODES	235
Displacement components of spheroidal and toroidal modes	239
Problem .....	252
REFERENCES .....	252
Index	255
